Manifesto for Agile Software Development

We are uncovering better ways of developing
software by doing it and helping others do it.
Through this work we have come to value:

Individuals and interactions over processes and tools
Working software over comprehensive documentation
Customer collaboration over contract negotiation
Responding to change over following a plan

That is, while there is value in the items on
the right, we value the items on the left more.

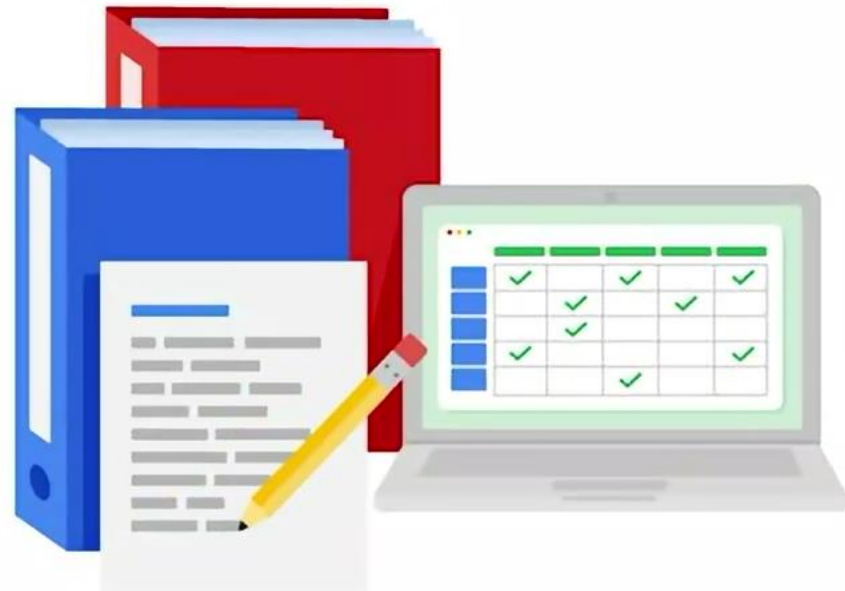
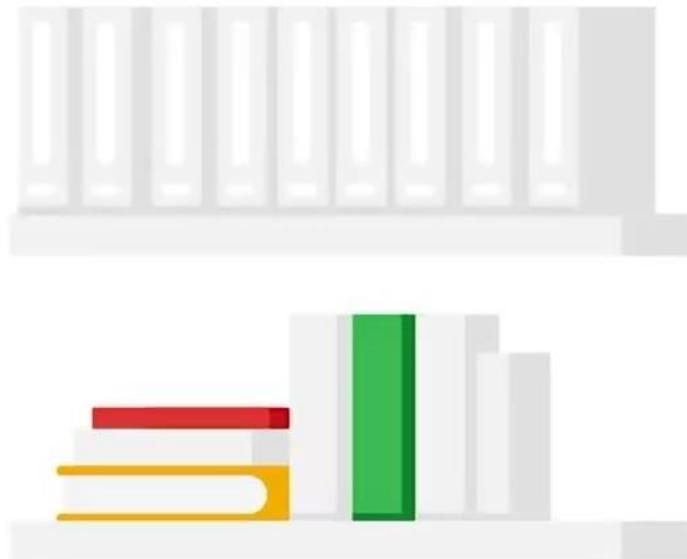
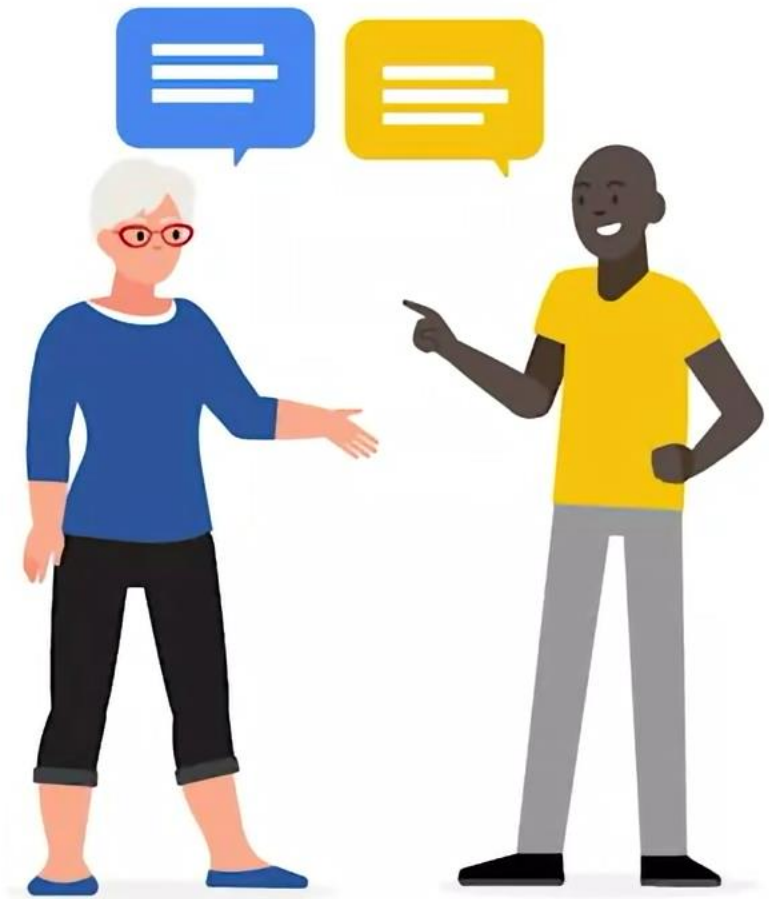
Agile values and principles inform the why, how, and what of Agile project management planning and processes.

- Work together.
- Collaborate.
- Help each other achieve the best outcomes possible.
- Value individual perspectives and creativity as important contributions to the success of the project.

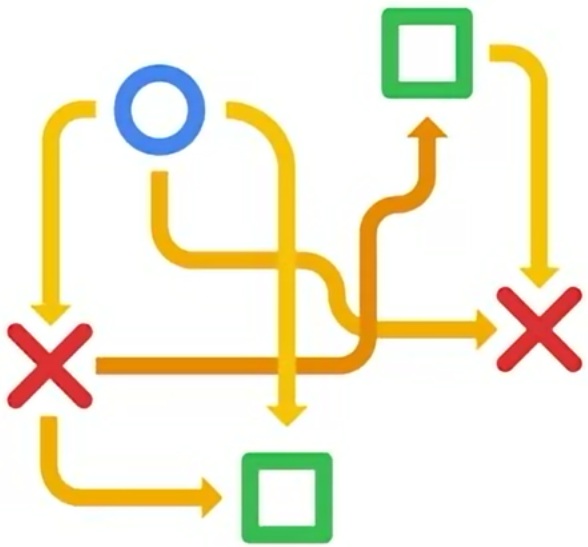


- Work on things that create value.





- Collaborate with customers early and often.
- React and adapt to feedback.



- Acknowledge that change is inevitable.
- Adapt to changes at any time during the project.

The 4 Agile values

- **Individuals and interactions** over processes and tools
- **Working software** over comprehensive documentation
- **Customer collaboration** over contract negotiation
- **Responding to change** over following a plan

Individuals and Interactions
