

The **Scrum Master** promotes and supports the Scrum process by helping everyone understand and implement Scrum.

Scrum Master's responsibilities

- Coaching team members on Agile and Scrum practices, rules, and values
- Helping to find ways to manage the Product Backlog effectively

Product Backlog

The single authoritative source for things that a team works on to achieve the project goal

- Product features
- Product requirements
- Activities associated with product deliverables

The Scrum Master is responsible for

- Facilitating Scrum events
- Helping the team remove blockers
- Preventing unhelpful interactions from outside of the team

- Organizational skills
- Supportive leaders
- Facilitate productivity and collaboration
- Coach team members
- Great communicators
